Digital Content Development

Information Technology has taken the world by storm. E-learning is the use of electronic educational technology in teaching and learning. Computers have become increasingly common in the classroom and the increasing access to computers is also changing the way classes are taught. Not only is the popularity of technology increasing because of its increasing availability, but also because of the capabilities of technologies that traditional classroom materials such as chalk and blackboard alone do not provide. Adsul's Technical Campus has always been a step ahead when it comes to using technology for benefit of students. The institute has a digitally enabled learning environment. Video-based learning is one of the best examples of improved technology in digital learning.

The recorded video lectures, video-based learning has offered improved learner experience with visual examples. Especially during the COVID pandemic it became a very effective platform for the teaching learning process. Our institute has taken initiative for the video lectures to fulfill the university prescribed curriculum. All the faculties from all the department have started video lecture recording, this online platform became a very effective and beneficial educational tool.

Objective: The objective of the Video-based e-learning is to give students a profound understanding of the course, concepts in better way as compare to face-to-face lecturing and accessing the course instructions and videos anytime and anywhere through institute's You-tube channel. To help students to reuse the content many times. To help to all types of students like below average, average and intelligent students.
